PROJECTS

MediVisa | MERN Stack

Jan'23 - May'23

- This application that allows students to **book** medical appointments across India for their **visa** application process.
- Streamlined the **document upload** process by integrating a user-friendly interface and also reducing segregating all major and well formatted documents from 5 days to 1 day.
- Among 46 approved hospitals, **Geo-location API** used to track user location and **display hospitals nearest** to them for medical appointment booking.
- Therefore, our application **simplifies** searching of medical testing hospitals for visas with better user experience.

Job Update | Django, Webscrapping, Cronjob, React

July'22

- Our job search website simplifies the process of **finding** the ideal job.
- It **aggregates** job listings from popular platforms like Internshala and Naukridotcom. Users can access a wide range of job opportunities **without** the need to visit multiple websites, hence it save user's time to visit each and every website for job.
- Users receive **personalized email** notifications every **three** days, ensuring they stay updated with relevant job opportunities.

EventRegistO | Flutter, Firebase

Oct'22 – Nov'22

- Students can use this project's platform to **view** and sign up for **upcoming** college club events.
- Additionally, they can provide **event feedback** so that event organizers clubs can make the necessary improvements.
- Therefore, this is a **one-stop** platform for all college students to get all **updates** of the event without the hassle of many Google forms, and also save time for student! Additionally, the event's organizers safely receive user information.
- Our objective is to **improve** student knowledge in different areas and participation in club activities.

DUComplaint | .NET, React

Feb'23 – May'23

- The university complaint management system is designed for students, faculty, and staff to **report** and **resolve** complaints regarding university services, policies, or personnel.
- Our system aims to help all employees and students to **raise their voice** their concerns and feedback effectively.

Simple Games | JavaScript, HTML, CSS

Oct'21 – Nov'21

- "Simple Games" contains some easy 4 games.
- We have made **unique** and **attractive** UI with help of CSS and Bootstrap for better user experience.

EXPERIENCE

Computer Society of India, Student Branch DDU

Oct'21 – Present

Graphic Designing Head

- CSI DDU is a tech-based club where the Head of the Graphic Designing team leads a team of talented designers and supervises all aspects of graphic design projects.
- The Head is responsible for conceptualizing and executing visually appealing designs that align with the club's objectives and brand identity, as well as collaborating with other teams to ensure seamless integration of graphics & designing.

DUHacks | National level Hackathon

July'21

- I have participate in the DUHacks hackathon. I gained knowledge on how to collaborate well with others and how to handle pressure during my involvement.
